

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1-12. (Canceled)

13. (Currently Amended) ~~In a portable collapsible enclosure of the type comprising a plurality of flexible side panels, each side panel comprising a frame supporting each of said plurality of side panels, each said frame comprised of at least one foldable supporting element, which, when unfolded, provides rigidity and shape to each of said plurality of side panels, the improvement comprising:~~ A portable, collapsible enclosure, comprising:

a plurality of flexible side panels, each side panel having a frame with at least one foldable supporting element, which, when unfolded, provides rigidity and shape to the side panel; and

at least one fringe-bearing element removably attached strip of flexible material attachable to a portion of at least one of said plurality of said side panels, having a hinge section for attachment to the side panel and a plurality of cutout elements connected to the hinge section wherein the cutout elements are of sizes and shapes that simulate foliage.

14. (Currently Amended) The invention of claim 13, wherein ~~said fringes~~ the cutout elements are shaped ~~to simulate as~~ leaves.

15. (Currently Amended) The invention of claim 13, wherein ~~said fringes~~ the cutout elements are shaped as circles.

16. (Currently Amended) The invention of claim 13, wherein ~~said fringes~~ the cutout elements are shaped as ~~squares~~ polygons.

17. (Currently Amended) The invention of claim 13, wherein ~~said fringes are shaped as triangles~~ the cutout elements have irregular shapes.

18. (Canceled)

19. (New) A portable, collapsible enclosure, comprising:

a plurality of flexible side panels, each side panel having a frame with at least one foldable supporting element, which, when unfolded, provides rigidity and shape to the side panel;

at least one strip of flexible material having a hinge section for attachment to at least one of the side panels and a plurality of cutout elements connected to the hinge section wherein the cutout elements are of sizes and shapes that simulate foliage; and

means for removably attaching vegetation to at least one of the side panels.

20. (New) The portable, collapsible enclosure of claim 19, wherein the means for removably attaching vegetation to at least one of the side panels are elastic strips.

21. (New) The strip of flexible material of claim 19 wherein the cutout elements are shaped as leaves.

22. (New) The strip of flexible material of claim 19 wherein the cutout elements are shaped as circles.

23. (New) The strip of flexible material of claim 19 wherein the cutout elements are shaped as polygons.

24. (New) The strip of flexible material of claim 19 wherein the cutout elements have irregular shapes.
